6/13/68

Dear Matt,

Saw Vince briefly in NYC Sunday when we both spoke at an RFK memorial rally in Central Park. He had to leave before it was over to attend a banquet for an old friend.

Penn is doing an book he and Tom Eaten and Gary wrote.

Yesterday D. told me you are in Houston. From this I take it you and she have been in touch. I told her I had asked you to make some copies of things for me if you have time. I told her if she so desired the undeveloped negatives could be mailed me and I'd stay in the dark room with them when they are developed and printed.

I am now satisfied of the basic validity of her story. I am also satisfied there is more.

She signals strongly in different ways that I should stay away from Godfrey. I think it is because she is worried about me. I am anxious to get the rest of what his mother has. I hope on your return you can find time to give me a lift here, for there are indications of interest now from the other side. If any of it gets out of her hands, we'll never likely see it again. Godfrey was an agent. I have learned his code identification. And a perfect yetey.

While I cannot afford to. I feel that on this and other things I must return there as soon as possible. There is some money due me that I should pay bills with and have for groceries, but I might return to N.O. instead. It cannot be until after the 20th, at the earliest, when I have a medical appointment. If you are not in N.O. and have not rented yo your place, may I stay there? If not, any suggestions?

I should have asked you before this, but have you any friends or connections who have any sources among the young homosexuals there. I mean especially in the late-teen up group and I am most interested now in those 20 or a little older? There are several on whom I'd like to try and get a rundown.

Perhaps I have made a major breakthrough on something we have never discussed. Tell you when I'm there. Also learned RFK was warned 3 weeks ahead of California attempt. I had been told by one of his people who was in N.O. 4/7 that he felt there were "already too many guns between him and the Presidency", hence his California lie about knowing what is in Archives. Best to you all,
